

LEPTONIX

TACTICALS

POSSIBILITIES

A bag that can be used as BCD (Buoyancy Control Device) and keeping goods dry!

It can be equipped with multiple options of inflators (lengths/types) , connections for quick fill cylinder, storages for cylinders, EBS systems, etc.

Open for your demands!

EASY TO ATTACH

Various possibilities to attach your complete diving equipment.

COLORS

BLACK

GREEN

BW CAMOUFLAGE

UW CAMOUFLAGE

Easy accessible compartments for quick fill cylinder, cylinders or EBS systems on both sides of the TACBAGS.

All Leptonix LUIGI XT weight pockets fit to the Backstraps of the high performance professional bag family!

SCENARIOS

INFLATED

The advantages of inflation are clear.

But did you ever thought about to use that opportunity for such solutions?
As well - you can use it as a rifle rest.

RAFT

Connect several bags by hooks!

Result is a raft or a rescue island.
Even ready to use for transport of injured comrades.

Can be pulled by a Jet Ski or a Scooter. Also works perfect as a transfer tool for heavy goods and equipment.

DROP

The inflated bag works like an airbag - maximal protection for your equipment. The bag also keeps floating on surface after drop off.

LIFT

Use the TACBAG FAMILY as lifting bags!

Multiple hook positions allow various possibilities of lifting.

DEFLATED

The possibility of deflation allows several innovative solutions. First of all, the vacuum effect keeps all goods in a dry and fixed position, preventing them from moving around.

STORAGE

The TACBAG Family can be used for hiding and storing sensitive equipment underwater, hidden and fixed between aquatic plants - ready for your mission.

TACBAG SNIPER

TACSNIPER

35

TACBAG35 comes with backpack straps outside. Easy to use like a rucksack!

TACBAG40/60/80 and TACBAG SNIPER - all back straps can be stored safely in a special compartment. No straps outside - for example during usage as a liftbag or during airplane travel.

TACBAG SNIPER is also equipped with molle on its back side. That allows you to mount the long sniper bag directly onto your LUIGI XT harness - or on any other molle harness.

An additional inflatable compartment at TACBAG SNIPER protects your sniper rifle and sensitive optics! It works like an additional airbag - for example during a helicopter drop off.

TACBAGS

Based on decades of experience developing the legendary Luigi BCD for the German Navy and international operational units and rescue teams, we have decided to launch a new brand – LEPTONIX.

A brand that does justice to its own significance
– goal-driven, uncompromising, forceful and lightning-fast.

LEPTONYX – Latin for sea leopard.

Under this brand we will be making available products, services and experiences to all recreational and professional divers that otherwise only Special Forces and the best of the best have access to.

In future we will be offering a small but impressive selection of innovations that we have assembled or developed for you.

WHAT ARE “SPECIAL FEATURES” IN OUR COMPETITORS’ PRODUCTS COME AS STANDARD WITH US.

A clear design language, premium materials such as “ballistic nylon” and “tactical textile”, and quality workmanship testify to the expertise of our specialists.

ALL USE AS BCD IS ON OWN RISK AND OWN HAZARD ASSESMENT! PD2 TECHNOLOGY IS NOT RESPONSIBLE FOR ANY DAMAGES TO LIVE AND LIMB. PD2 TECHNOLOGY CAN NOT BE HELD RESPONSILBE.

IF CE CERTIFICATION AND NON MAG VERSION IS REQUIRED - PLEASE TALK TO US - WE ARE HAPPY TO FIND A SOLUTION CONCERNING YOUR REQUIREMENTS
